

SECTOR PROPHITIS ANDREAS

Climbing: Varied climbing with some fantastic compact slabs up to 30-40m high in the middle of the crag. Routes are well-bolted and "user-friendly", albeit somewhat sharp at the moment, but they are sure to improve over time.

Gear: Bring an 80m rope and 21 quickdraws for maximum enjoyment. (However, you can climb several routes with just a 70m rope and 16 quickdraws.) Don't forget the **KNOT** at the end of your rope!!

Kids: Good. The approach is fairly easy and the terrain beneath the cliffs is relatively safe.

Conditions: Climbing at Prophitis Andreas is best in the spring, fall and winter, as the cliffs stay relatively dry. If you are an early bird, summer climbing is possible on days with a northerly breeze (shade until noon.) Avoid very windy days.

Shade: In the morning until about 12.00. **Exposure:** SW

Approach: From Masouri, drive towards Emporios. Pass the village of Skalia & turn right towards Palionisos. At the top of the road there is a chapel with a large cross. Across the road on your right-hand side there is a sign to the crag and a parking area. Park there (37.04348, 26.952927). Follow the trail marked in red eastwards. The trail passes to the left of the distinctive ridge overlooking Palionisos and the island of Leros then it goes up to the col, where an incredible southwesterly view of Telendos unfolds. **Walking time:** 20 min.
