

# Space Walk

One of the easiest multi-pitches on Kalymnos, picking its way to the highest point above Panorama.

**GEAR:** 70m rope and a good selection of quickdraws, including some long ones.

**PITCH 1** Grade 2. Make an easy scramble/walk along the ramp to a belay. There are no bolts on this pitch.

**PITCH 2** Grade 3: Follow the ledge leftwards to the second belay.

**PITCH 3** Grade 4: Drop down (clipping a bolt on Medical Project to protect your second) and follow the low-angled rock left with just a couple of remotely technical moves to a belay just right of the final groove of *L'Homme Qui Tombe a Spit*.

**PITCH 4** Grade 5: Follow the groove of *L'Homme Qui Tombe a Spit* continuing past its clipper lower-off to a belay on the slab above.

**PITCH 5** Grade 4: Follow the big slab up and left to the edge of a large ledge/meadow. The belay is set back a few metres.

**PITCH 6** Walk back through the 'meadow' to the base of the final pitch.

**PITCH 7** Grade 5: Climb the pocketed wall to the top of the wall.

**DESCENT:** The last pitch can be descended by abseil, lowering-off, or with a little care by walking around. From the meadow (top of the 5<sup>th</sup> pitch) abseil to the belay of one of the routes below—the belay of *D.T.F.* is probably the best-placed. Take care not to get your rope snagged on bushes and consider removing any that pose a threat. Another option is to use an abseil station above the central section of *Panorama*, though at the time of writing that was not equipped with a maillon. Alternatively, with two 80m ropes you can walk along to the abseil station above the *Grande Grotta* and come down that way.
